**Resource Management (Enabling Housing Supply and Other
Matters) Amendment Bill**

*Proposed amendments for the consideration of the Committee of the
whole House*

Key:

- **this is inserted text**
- **~~this is deleted text~~**

Note: This Supplementary Order Paper shows amendments to the Bill that are being proposed by the Minister for the purposes of consideration in Committee of the whole House. This document does—

- NOT have official status in terms of unamended text
- NOT have the status of an as-reported version of the Bill.

Explanatory note

This Supplementary Order Paper gives effect to most of the recommendations made by the majority of the Environment Committee in its report on the Resource Management (Enabling Housing Supply and Other Matters) Amendment Bill.

Intensification streamlined planning process (ISPP)

Clause 8, new section 80DA

The scope of the ISPP is broadened to enable an intensification planning instrument (an **IPI**) to be used to—

- change provisions in plans (including objectives, policies, rules, standards, and zones) that are consequential and complementary to the medium density residential standards (**MDRS**) and the National Policy Statement on Urban Development (**NPS-UD**) intensification policies:
- enable provision of papakāinga.

The link between the MDRS and the NPS-UD is clarified. Both the MDRS and the NPS-UD need to be implemented via the IPI. Where the NPS-UD is applied to a relevant residential zone, the underlying zoning will include the MDRS (at a minimum) and therefore any greater level of intensification (such as a 6-storey building) will likely require resource consent as a restricted discretionary activity.

Clause 7, new section 77F

Existing plan provisions continue to have effect provided they are not inconsistent with the Bill.

Clause 14, new clause 96

The independent hearings panels must, if tāngata whenua consider it appropriate, have at least 1 member with an understanding of tikanga Māori and the perspectives of local iwi or hapū, in consultation with relevant iwi authorities.

Clause 7, new section 77HA

If a qualifying matter has already been through a plan-making process, significant evidence would not need to be provided and the matter would not be reconsidered through the ISPP. The qualifying matter could be carried across, and a council's assessment would focus on how to accommodate the qualifying matter through appropriate heights and densities.

MDRS

Clause 7, new sections 77F, 77FA, 77J, Schedule 1, new Schedule 3A

The MDRS included in the Bill as introduced are amended.

New MDRS regarding glazing and landscaping are added.

**Proposed amendments to
Resource Management (Enabling Housing Supply and
Other Matters) Amendment Bill**

SOP No 106

MDRS will apply to all relevant residential zones in tier 1 council plans, rather than urban environments.

Councils that want their plans to be more enabling of development can omit any standards in the MDRS when they adopt the MDRS in their plans. If a council does this, it cannot regulate the same effect in its plan.

Objectives and policies for the MDRS are included in the Bill.

The MDRS will apply to land designated for schools.

Amendments are made to clarify which parts of plans would have immediate legal effect. Only the specified standards in the MDRS and the MDRS objectives and policies would have immediate legal effect.

Amendments are made to enable councils to modify the MDRS and NPS-UD intensification policies to accommodate qualifying matters where such matters are present.

Tier 2 and tier 3 councils

Clause 8, new sections 80E, 80FA, 80FB

The Minister for the Environment will be required to consult the Minister for Māori Crown Relations—Te Arawhiti, as well as the Minister of Housing, before directing a tier 2 council through an Order in Council to implement the MDRS and give effect to the NPS-UD via the ISPP.

If a tier 2 council is brought under the legislation by an Order in Council, it will need to prepare an IPI and go through the ISPP to incorporate the MDRS, give effect to the NPS-UD and, if necessary, change its financial contributions policies and make any consequential and complementary changes to its plans. This will avoid the need for multiple plan changes.

Amendments are made to enable any tier 3 council (as defined by the NPS-UD) to ask the Minister for the Environment to direct it to implement the MDRS and NPS-UD via the ISPP.

Subdivisions

Schedule 1, new Schedule 3A, clauses 2A, 4(3)

Subdivision will be a controlled activity for existing dwellings that meet the MDRS, new dwellings that are permitted under the MDRS, or dwellings that have been approved through a resource consent.

Subdivision consent for residential units in accordance with the MDRS or an associated land use consent must not be publicly notified or given limited notification.

Building height in relation to boundary

Schedule 1, New Schedule 3A, clause 10

A building must not project beyond a 60° recession plane measured from a point 4 metres vertically above ground level along all boundaries.

Financial contributions

Clause 6B, new section 77DA, clause 7, new section 77P

Rules incorporating or updating financial contributions provisions in proposed plans that go through the ISPP will not have immediate legal effect. Instead, financial contributions provisions will be subject to the consultation requirements in the ISPP before coming into effect.

Transitional provisions: existing plan changes

Schedule 3, clauses 32 to 37

Councils that have already notified a proposed district plan at the time of the Bill's commencement should not be required to modify their operative plans, and should instead use the ISPP to vary their proposed district plans to incorporate the MDRS and give effect to the NPS-UD intensification policies.

Councils that have notified plan changes at the time of the Bill's commencement (including private plan changes that councils have adopted or accepted) should notify a variation to the plan change to ensure that it incorporates the MDRS. They should notify the variation alongside their IPI and the plan change will be able to continue.

Councils can choose to accept or adopt a private plan change request that proposes to adopt all the zone provisions of a relevant residential zone. In this instance, the council's IPI will incorporate the MDRS into relevant residential zones within the scope of the private plan change.

Departmental disclosure statement

The Ministry for the Environment considers that a departmental disclosure statement is not required to be prepared for this Supplementary Order Paper.

The Honourable David Parker, in Committee, to propose the amendments shown in the following document.

- (a) using the ISPP;
 - (b) if the ISPP is inapplicable, using another plan-making process in this Act.
- (3) ~~In carrying out its functions under this section, the territorial authority must ensure that the provisions in its district plan for each relevant residential zone within the authority's urban environment give effect to the MDRS.~~
- (4) ~~In carrying out its functions under this section, each territorial authority—~~
- (a) ~~may create new residential zones or amend existing residential zones; and~~
 - (b) ~~may make the MDRS more permissive in their requirements in relation to any area within a relevant residential zone than the requirements set out in **Schedule 3A**—~~

 - (ii) ~~to give effect to policy 3(d) or policy 5, as applicable; or~~

77F Duty of specified territorial authorities to incorporate MDRS and give effect to policy 3 or 5 in residential zones

- (1) Every relevant residential zone of a specified territorial authority must have the MDRS incorporated into that zone.
- (2) Every residential zone in an urban environment of a specified territorial authority must give effect to policy 3 or policy 5, as the case requires, in that zone.
- (3) When changing its district plan for the first time to incorporate the MDRS and to give effect to policy 3 or policy 5, as the case requires, and to meet its obligations in **section 80DB**, a specified territorial authority must use an IPI and the ISPP.

- (5) A specified territorial authority—
 - (a) must include the objectives and policies set out in **clause 4A of Schedule 3A**:

- (8) The requirement in **subsection (1)** to incorporate the MDRS into a relevant residential zone applies irrespective of any inconsistent objective or policy in a regional policy statement.

77FA Requirements in Schedule 3A may be modified to enable greater development

- (1) In addition to giving effect to policy 3 or policy 5, a specified territorial authority may enable a greater level of development than provided for by the MDRS by—
 - (a) omitting 1 or more of the density standards set out in **Part 2 of Schedule 3A**:
 - (b) including rules that regulate the same effect as a density standard set out in **Part 2 of Schedule 3A**, but that are more lenient than provided for by the MDRS.
- (2) To avoid doubt, **more lenient** means the rule (including a requirement, condition, or permission) permits an activity that the MDRS would restrict.
- (3) A specified territorial authority is considered to have met its obligations under **section 77F(1)** by acting in accordance with **subsection (1)** of this section.
- (4) A specified territorial authority may choose not to incorporate 1 or more density standards set out in **Part 2 of Schedule 3A** into its district plan, but, in that case, the authority may not (in its district plan) regulate the same effect as the density standard.
- (5) To avoid doubt, if a density standard is incorporated into a specified territorial authority's district plan under **subsection (1)**, the density standard does not have immediate legal effect under section 86B when an IPI incorporating the density standard is notified.

77G Qualifying matters in applying medium density residential standards and policy 3 to relevant residential zones

A relevant specified territorial authority may make the MDRS and the relevant building height or density requirements under policy 3 less permissive enabling of development in relation to an area within a relevant residential zone if that change is required only to the extent necessary to accommodate 1 or more of the following qualifying matters that are present:

- (a) a matter of national importance that decision makers are required to recognise and provide for under section 6:

**Proposed amendments to

- (d) open space provided for public use, but only in relation to land that is open space:
- (e) the need to give effect to a designation or heritage order, but only in relation to land that is subject to the designation or heritage order:
- (f) a matter necessary to implement, or to ensure consistency with, iwi participation legislation:
- (g) the requirement in the NPS-UD to provide sufficient business land suitable for low density uses to meet expected demand:
- (h) any other matter that makes higher density, as provided for by the MDRS or policy 3, inappropriate in an area, but only if **section 77I** is satisfied.

77H Requirements in relation to evaluation report

- (1) This section applies if a territorial authority is amending its district plan (as required by provided for in **section 77F**).
- (2) The evaluation report from the relevant territorial authority referred to in section 32 must, in relation to the proposed change,—
 - (a) in relation to an area for which the territorial authority is proposing to make an allowance for a qualifying matter, demonstrate why—
 - (i) the territorial authority considers that the area is subject to a qualifying matter; and
 - (ii) the qualifying matter is incompatible with the level of development permitted by the MDRS (as specified in **Schedule 3A**) for that area; and
 - (b) assess the impact that limiting development capacity, building height, or density (as relevant) will have on the provision of development capacity; and
 - (c) assess the costs and broader impacts of imposing those limits; and
 - (d) include,—

- ~~(i) a description of how the provisions of the district plan are consistent with the development outcomes provided for in **Schedule 3A**:~~
 - ~~(ii) a description of how modifications to the MDRS as applied to the relevant residential zones are limited to only those modifications necessary to accommodate qualifying matters, and in particular how they apply to any spatial layers relating to overlays, precincts, specific controls, and development areas, including—
 - ~~(A) any operative district plan spatial layers; and~~
 - ~~(B) any new spatial layers proposed for the district plan.~~~~
- (2) The evaluation report from the specified territorial authority referred to in section 32 must, in addition to the matters in that section, consider the matters in **subsections (3) and (4)**.
- (3) The evaluation report must, in relation to the proposed amendment to accommodate a qualifying matter,—
 - (a) demonstrate why the territorial authority considers—
 - (i) that the area is subject to a qualifying matter; and
 - (ii) that the qualifying matter is incompatible with the level of development permitted by the MDRS (as specified in **Schedule 3A**) or as provided for by policy 3 for that area; and
 - (b) assess the impact that limiting development capacity, building height, or density (as relevant) will have on the provision of development capacity; and
 - (c) assess the costs and broader impacts of imposing those limits.
- (4) The evaluation report must include, in relation to the provisions implementing the MDRS,—
 - (a) a description of how the provisions of the district plan allow the same or a greater level of development than the MDRS:
 - (b) a description of how modifications to the MDRS as applied to the relevant residential zones are limited to only those modifications necessary to accommodate qualifying matters and, in particular, how they apply to any spatial layers relating to overlays, precincts, specific controls, and development areas, including—
 - (i) any operative district plan spatial layers; and
 - (ii) any new spatial layers proposed for the district plan.
